Java

```java
class Solution {
    public String findLongestWord(String s, List<String> dictionary) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string} s
 * @param {string[]} dictionary
 * @return {string}
 */
var findLongestWord = function(s, dictionary) {

};
```

C++

```cpp
class Solution {
public:
    string findLongestWord(string s, vector<string>& dictionary) {

    }
};
```

C#

```csharp
public class Solution {
    public string FindLongestWord(string s, IList<string> dictionary) {

    }
}
```
